

► ELECTRIC HANDCYCLE

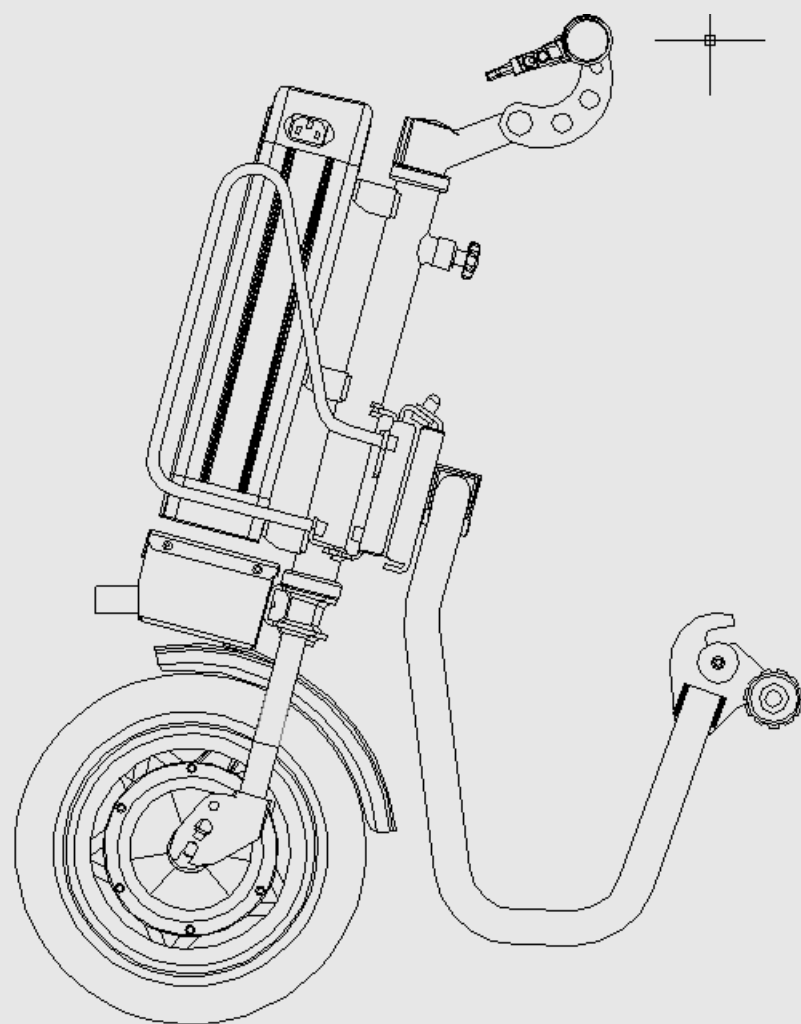

► DETACHABLE

BYCODRIVE is a device for the motorization of the wheelchairs. It's unique in this kind because it doesn't need to be removed to get up and down from the wheelchair. In case of need, it can to be easily removed and eventually also separated in many lighter and handy portions, easy to be inserted in the luggage van of any car. It has a full chassis in galvanized steel, guarantee of solidity and durability. It can be placed inside any travel bag and carried anywhere. Even on the plane.

SPECIAL NOTES. By a practical kit sold separately, the folding scooter BYCOPLUS can be easily converted to a haul unit to be hooked to the wheelchairs. Here by specifically the folding wheelchair VASSILLI Art. 17.70N - Evolution Activa Compact.
